MIMMIT – the two sisters from Brindlebrass forest – take us through the seasons of nature, to the mystical fairytale world of the Nordic countries and from there all around the world. Finest instrumental music and the folkloristic style makes this series a feast for the eyes and the ears.

The MIMMIT episodes are musical tales in which the MIMMIT have adventures in their homeforest and also travel to distant lands. There they meet enchanting characters – familiar from tales and fables – such as witches, princesses, exotic animals, trolls and monsters. Even a talking tree... The general approach of the series is a concern for the environment.

A NEW AND REFRESHING series with danceable world music and Nordic mystique.
