2019

The most visually stunning photographic records of traditional societies are always the result of an enduring love story between the photographer and the society they are capturing. The documentary series, Travelling Photographers follows five renowned photographers in the field as they visit traditional communities who they forged ties with decades ago and have been photographing ever since. Each film provides viewers with an opportunity to share the photographer's relationship with the traditional community and to discover unknown cultures and a behind the scenes glance into the photographer's work.
