A teenager in social failure will rebuild its life with the help of a horse educator! Yes, a four-legged educator!

In each episode, a teenager is individually accommodated for 10 days at a specialized equestrian farm. The horse known for its educational role will help establish a climate of trust, restore the link with the adult, enhance the skills of the teenager and reinstate his image. Under the benevolent eye of the farm manager, this animal mediation allows the teenager to spend time with horses, to take care of them, to feed them, to walk around them ... And very quickly, unsuspected effects appear!

This alternative educational method has proven itself! And even more extraordinary, the animal succeeds in its mission of educator, where our traditional educational methods fail!

Filled with emotional moments and poignant stories, the magic happens when the animal takes it over.
