FORMAT:
HD

YEAR:
2004

A futuristic spin on the classic tale, filmed in visually stunning animation. Geppetto creates Pinocchio, a super-robot equipped for imagination thanks to the P3K microprocessor. But Scamboli, Geppetto's archrival, is jealous of Pinocchio and Pinocchio's friendship with his daughter Marlene. Scamboli manipulates Pinocchio into helping him with a devious scheme to turn all children into robots, but Pinocchio realises that something is wrong. With the help of his friends, Pinocchio confronts Scamboli and learns the valuable lessons that Cyberina, the holographic fairy, requires of him to become a real boy. A cyperclassic!
